SUMMARY

Software Engineer with 2 years of extensive experience in Front-End Technologies, Software Development, and Agile Methodologies. Proven track record of deploying highly optimized, performant, user-friendly products to production.

EXPERIENCE

Software Engineer I
Best Buy   **November 2021 - Present**

· Built, managed, and optimized UI for BestBuy.com mobile activations pages as well as retail-only UI used by employees that assist in-person customers.

· Communicate with major mobile carriers (Verizon, T-Mobile, AT&T, Sprint, and Google) to ensure their individual requirements are successfully met.

· Built an in-house browser extension to be used by team developers and Quality Assurance to expedite mocking different scenarios to increase efficiency in catching any defects; pre-production.

Associate Software Engineer I
Best Buy   **June 2021 - November 2021**

Associate Digital Engineer I
Best Buy   **February 2021 - June 2021**

System Developer (Internship)
Best Buy   **October 2020 - February 2021**

Advanced Repair Agent
Geek Squad   **April 2019 - October 2020**

· Diagnose and repair personal computer issues, achieving an average repair rate of over 1 repair per hour with less than a 1% return for redo rate.

· Provide recommendations to extend the usability and reliability of customer computers.

· Train and develop new technicians beginning their IT careers.
